

FCA CID parameters applied according article 4.4

The document outlines the different parameters considered for assigning the border income to different interconnectors, where this is needed.

The “Involved TSOs / Parties” may differ from those shown in the CCR Decision for a specific Bidding Zone border when non-TSOs are present in the border.

Bidding Zone border	Involved TSOs/ Parties	Parameters applied
IT-AT	Terna, APG, Eneco Valcanale	Assignment of congestion incomes to the two interconnectors (IC Terna - APG and IC Eneco Valcanale) on the bidding zone border IT –AT follows a proportional rule: <ol style="list-style-type: none">1) In particular, for each hour, the contribution given by each IC to the total NTC of the border is evaluated on the basis of technical considerations and the maintenance plan of single tie lines;2) Then the long term congestion income on border IT-AT are assigned to the two IC in proportion to the contribution calculated in point 1);3) finally the sharing key according to art. 4.1 and 4.2 of the methodology is applied.
